

Join us on the second Thursday of every month for a series of "brown bag" seminars sponsored by the National Renewable Energy Laboratory and the U.S. Department of Energy. Each seminar is held at NREL's Washington offices with a video-conference link to Golden, Colorado. Topics focus on new and innovative renewable energy and energy analysis strategies, models, and technologies.

Energy Analysis Seminar Series

A "brown bag" analytical seminar series

Greenhouse Gas Emissions Reduction Plans

Robert C. Shinn, Jr.

August 9, 2001

12:00–1:00 p.m.

As evidence mounts and the scientific consensus on greenhouse gasses (GHGs) grows, New Jersey is leading the way in the reduction of GHG emissions with in-state, regional, and international initiatives. Concerned about rising sea levels due to climate change, New Jersey's statewide program employs an integrated strategy of energy efficiency, pollution prevention, and wastewater management. Concurrently, New Jersey is working with neighboring states to develop a universal protocol for evaluation, verification, and certification of new energy efficiency and renewable energy programs—a key first step in advancing energy efficiency and GHG reducing technologies.

Robert C. Shinn, Jr. is the 11th Commissioner of the New Jersey Department of Environmental Protection. Shinn is current president of the Environmental Research Institute of the States and is a past president of the Environmental Council of the States.

Future seminar topics

- ❖ **Life Cycle Analysis**
- ❖ **Distributed Energy Resources in Distribution Systems (Case Studies)**
- ❖ **Federal Subsidies for Renewable Energy Technologies**
- ❖ **Natural Gas Supplies**

370 L' Enfant Promenade is located adjacent to the Forrestal building at 901 D Street SW in downtown Washington (Aerospace Building). Please contact Wanda Addison at NREL at wanda_addison@nrel.gov
